The top 3 ways households in Evans conserve water:

- 89% of respondents are conscious of how long the faucets run
- 78% of respondents use a spray nozzle on the hose to prevent water waste while watering outside
- 76% of respondents have energysmart appliances for washing clothes or dishes

From April to September, outdoor watering accounts for nearly half of the City's water use. How should the City save water and money?

Top 4 Answers

- 1 Require new developments to install water-efficient irrigation systems
- 2 Create incentives for developers and property owners to install water-efficient irrigation systems
- 3 Encourage older developments to transition to non-potable water for landscaping use where possible
- 4 Incentivize native landscapes

How important is conserving water to you and your household?

48% of respondents say that conserving water is very important to their household

What concerns do you have about the future of the City of Evans water resources?

- 80% The cost of my water bills increasing and becoming unaffordable
- 55% Is there enough water for future development?
- 69% The cost to the taxpayers for developing new water supplies (buying water from other communities)

How important is it for the City of Evans to manage water resources compared to other issues such as maintaining roads for example?

Very Important	24.7%
Important	37%
Neutral	32.9%
Not Important	5.5%
Not Important at all	1.4%
